

The screenshot displays the JupyterLab environment. On the left, the 'Anaconda Toolbox' sidebar is visible, featuring sections for 'Anaconda Cloud' (with options to create a new project, notebook, or view projects), 'Code Snippets' (with a manage snippets option), and 'Anaconda AI Assistant' (with a chat-based Python help option). The main area shows the 'jupyter' interface with a 'Running' tab selected. Below the tabs, there's a prompt to 'Select items to perform actions on them.' and buttons for 'New', 'Upload', and a refresh icon. The file explorer shows a list of files and folders in the current directory, including 'anaconda_projects', 'anaconda3', 'Cisco Packet Tracer 8.2.2', 'Contacts', 'Desktop', 'Documents', 'Downloads', 'Favorites', 'Links', 'Music', 'OneDrive', 'Oracle', 'Pictures', 'Saved Games', 'Searches', 'Videos', 'Untitled.ipynb', 'Untitled1.ipynb', 'CTEC4025.sql', 'CTEC4025-1.sql', and 'CTEC40251.sql'. The rightmost column of the file explorer shows the 'Last Modified' time and 'File Size' for each item.
